

QUALITY MANAGEMENT SYSTEM

ENVIRONMENTAL POLICY

Our vision is to be the place where creative minds engineer a sustainable future.

Our mission is to accelerate decommissioning.

At React, we don't just do the thing right, we recognise and do the right thing.

We empower our people. We lead with integrity. We solve with pragmatism.

We deliver positive outcomes for our customers, people, partners, community and industry.

MIND OVER MATTER

As detailed in our vision and mission React Engineering Ltd recognises that it has a responsibility to the environment beyond legal and regulatory requirements.

To support the achievement of the vision and mission we are committed to:

- Ensure our environmental performance and impact is an integral part of our business strategy and encourage customers, suppliers and other stakeholders to do the same.
- Continually improving our environmental performance by regularly reviewing reducing our impact

Our environmental performance focuses on the six main objectives below:

1. To contribute to a sustainable future.
2. To deliver our services in an environmentally responsible and ethical manner.
3. To provide a suitable working environment and culture that will enable the effective delivery of all business objectives.
4. To minimise the environmental impact of all office-based activities.
5. To consider the environmental impact of business travel to other locations with the aim to select the most appropriate method, challenge unnecessary travel and suggest alternative arrangements when necessary to effectively achieve the business activity.
6. Minimise the environmental impact of maintenance and cleaning activities in the office

Regular audits will be carried out to ensure the aims set out in this Policy are met, in line with the Environmental Management Procedure (A08001/P/090).

For and on Behalf of React Engineering Limited

Phil Redfern, Managing Director
