

2025-26 RECAP

SWIPE →

What a year!

From significant achievements to the exciting move into our new head office at **The Flaxworks**, we've strengthened our foundations for the future; positioning ourselves for **continued growth, innovation, and success.**

Here's a look back at some of our key moments!

New head office

Our biggest milestone yet! Moving into our new head office at **The Flaxworks, a sustainable, regeneration project** supporting our growing team and long term vision.

Delivery partners

April '25

Monitoring the condition of highly active wastes

From early-stage problem definition through to technology development and on-site integration, **we help deliver waste monitoring systems that play a critical role** in the UK's nuclear waste management strategy.

May '25 } Teamwork & Community Focus

Goodlives

A year of giving back with our team supporting a range of charitable and community initiatives.

From the K2B 40 mile walk and Great React Bake Off, to Care for Children and volunteering for The React Foundation, Schools of the Future programme, **we're proud of the impact we have made together.**

June '25 WAGR Grand Challenge

Working as part of the core delivery team, we have been **defining and shaping the plan for the accelerated decommissioning** of the iconic Windscale Advanced Gas-cooled Reactor; developing an approach to realise the WAGR Grand Challenge vision, **providing a platform for acceleration across the wider site.**

July '25 Mobile Robotics

Working with Sellafield Ltd, Createc, and Atkins to develop high value use cases **to accelerate the adoption of autonomous quadrupeds** at Sellafield, enabling repeatable task delivery across the site **while delivering key benefits**, including improved time and cost efficiency, reduced operator exposure to hazardous areas, and enhanced data collection capabilities.

August '25

High Active Liquor
Evaporation & Storage
Plant POCO Evaluation

Evaluating a range of Post Operation Clean Out (POCO) approaches for a highly active chemical plant to **define the optimal strategy** for **safe and effective plant decommissioning**.

September '25

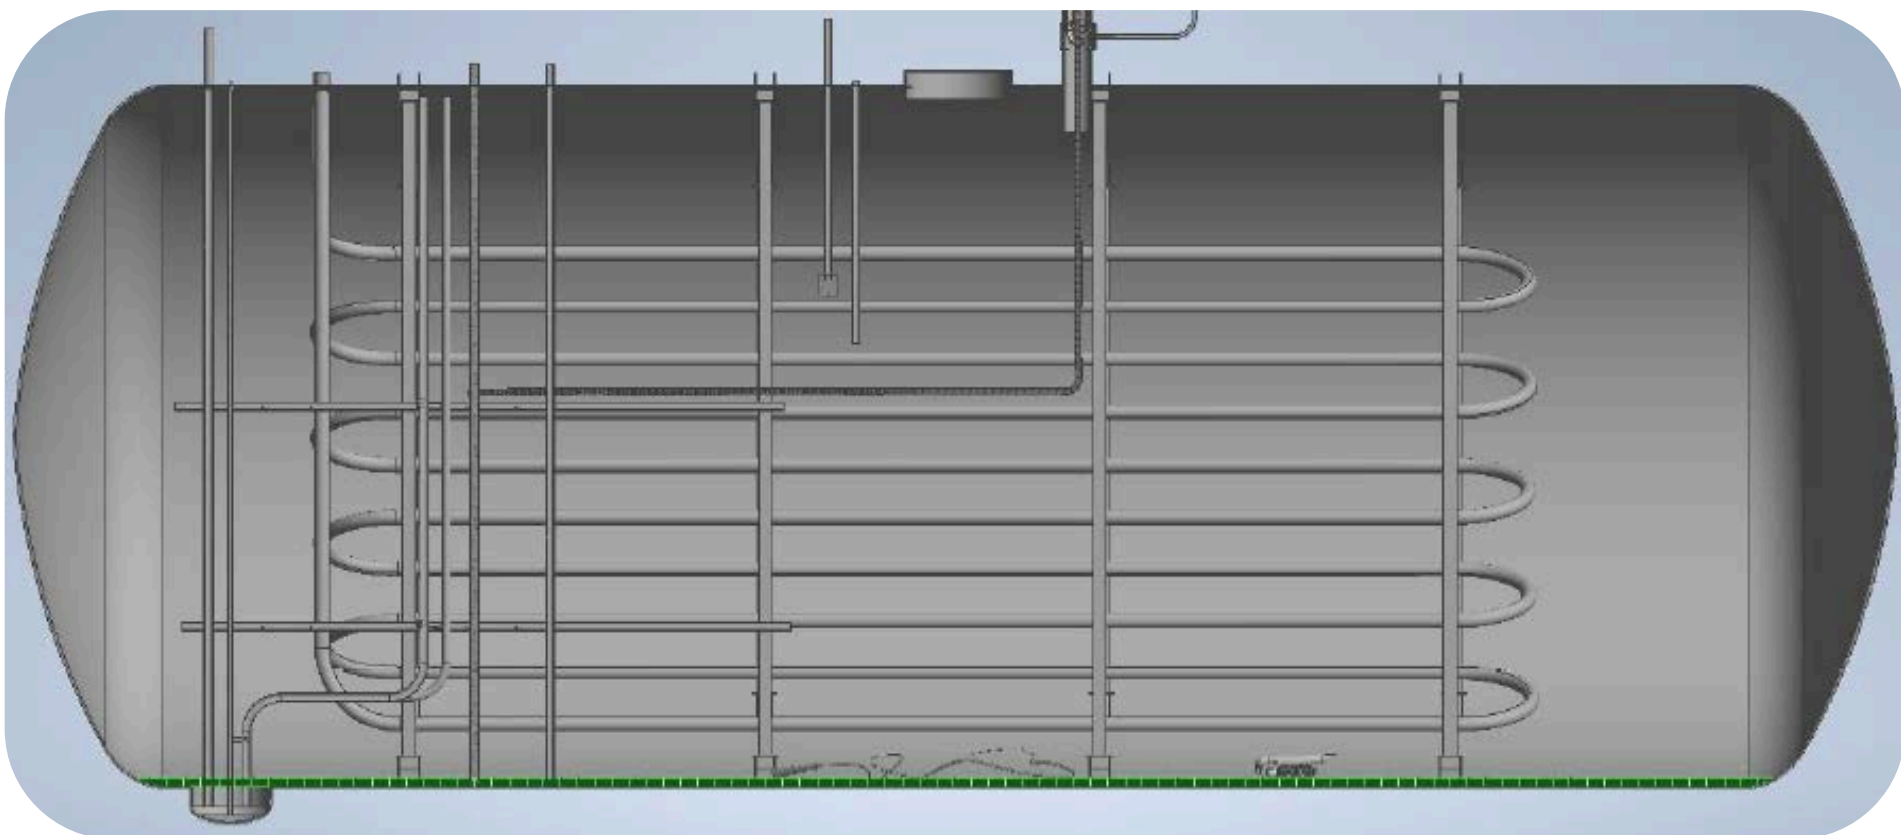

Major Project Improvements

Supporting our key client to **revise & rebaseline their project delivery strategy** to align with Remediation's Decommissioning Lifecycle Approach principles. This will **refine and refocus the delivery** to enable major improvements.

October '25

Rapid Solution
Development &
Trialling

Delivering engineering support; from problem definition and technical calculations through to rapid prototyping and Factory Acceptance Testing, to **enable the safe retrieval of active process solids** from the Medium Active Salt Evaporator's (MASE) Feed Storage Tanks.

Find out more about MASE [here!](#)

November '25 ^{WNE}

Our time at the World Nuclear Event (WNE) in Paris was an excellent opportunity to **expand our network, and connect with key partners** across the nuclear industry, while gaining insight into the **latest advancements driving the sector forward.**

December '25

Improving Delivery
Efficiency

- We introduced a **new workweek planning approach** for our defence nuclear client, giving the site clearer **forward visibility** and **strengthening delivery performance**.
- We developed a **bespoke** digital tool that tracks project status **improving transparency** and **boosting confidence in work delivery**.

January '26 Global Engagement

Welcoming a delegation from Japan's Ministry of Economy, Trade and Industry (METI) providing a valuable opportunity to share insights on how **decommissioning** can support **economic regeneration**.

The visit also **strengthened international relationships** and showcased what **Cumbria** has to offer.

February '26 Change Programme

Supported the Contact Handleable Intermediate Level Waste Programme to make the **strategic and economic cases for a multi-hundred-million-pound store**; an essential enabler for decommissioning and central to Sellafield Ltd's mission to **create a clean and safe environment for future generations**.

Our input to the Outline Business Case, working with Sellafield's Programme Team, Programme and Project Partners (PPP) and stakeholders, has been fundamental to its approval through Sellafield Ltd., Nuclear Decommissioning Authority (NDA) and onto Government.

March '26

Decommissioning Grand Challenges

Driving **innovative solutions** for the accelerated decommissioning and demolition of Sellafield's redundant Plutonium Purification Plant; working with JBV to define the most effective approach to **deliver end-to-end solutions in complex nuclear environments.**

Our **strategic and technical leadership** is **driving real change** at Sellafield; a point reflected in the positive recognition of our approach and collaboration by the sector's G6 (Sellafield Ltd. Executives, NDA, ONR, EA, DESNZ and UKGI).

Lastly...

Thank you to our clients,
partners and team for your
continued support.
